QTSGREEN | IN PARTNERSHIP WITH ONETREEPLANTED

One Tree Planted
GROW WITH QTS

1 tree donated

for every 100 kW that is contracted, not used

each month

per customer

GROW WITH QTS

¼ Ton of CO_2 saved per tree

25,000 min trees/year

Covers all current and new QTS Customers

QTS strives to be best in class, not just in how we deliver our data center services, but in how we address sustainability and partner with our communities.

As strong advocates for environmental sustainability QTS actively supports initiatives that protect and restore natural ecosystems and has committed to donate a minimum of 25,000 trees annually to help restore threatened forest ecosystems.

This commitment has led QTS to partner with *One Tree Planted*, an environmental nonprofit that recognizes trees as powerful tools for carbon capture, helping to stabilize our climate and mitigate the impacts of global warning.

Partnership to Plant for Impact

One Tree Planted is focused on delivering maximum impact for their donations, working each year to ensure that at least 80% of all funds raised go toward reforestation. Every *One Tree Planted* project begins with a detailed proposal from a local planting partner. Once a project has been fully funded and planting has been completed, the team works closely with reforestation partners to map and record growing trees. This data transparency allows *One Tree Planted* to analyze the impact the trees will have on overall forest health, biodiversity and surrounding communities.

For more information on *One Tree Planted*, their conservation efforts and how to get involved, visit **www.onetreeplanted.org**.

ACROSS THE GLOBE:
- Founded 2014
- 135.5 Million trees planted with 378 partners across 82 countries
